Dear FCC:

Dear Sirs:

I hope that you will reject the notion of raising the fees of Tracfone service, which is the only cell phone service affordable for old people like me to use while driving around town to the doctor and grocery store and pet store, etc. As a Social Security recipient ---- at least so far though threatened by privitazation under the present Federal Administration ---- it is difficult, if not impossible, to afford the usual cell phone prices.

Sincerely,

Donald F. Thielke

Thank you for your prompt attention to this matter. Please provide a written response indicating the status/resolution of this matter.

Very truly yours,
